COMMENTS:

Request to flare is being made as a result of Anadarko shutting down their Third Creek System which was the gas sales outlet for the Nordman Estate 10-7. It is estimated that approximately 3 MCFD from the well will be flared using a central tank battery combustor. No hydrogen sulfide is present in the gas. A gas analysis from the lease meter is attached.

Operator Comments:

This flaring request is made necessary by the shutting down of the Anadarko Third Creek Gathering System. The Nordman Estates 10-7 was making approximately 1 BOPD and 3 MCFD when the shut in took place. Oil revenue dominates the economics of this well. At this early stage of the shut in no timely alternatives appear viable to reestablish beneficial gas deposition and the length of this request to flare is unknown at this time.
