To: Erin Lind <erin.lind@crestonepr.com>

Erin,

COGCC is in the process of reviewing the Melbon Ranch Facility (Amended 2A doc no 401667378). In order for us to complete our review, please address the following:

1. As this is an amended location, please explain what is new equipment vs. original. Will all the original equipment be staying? Please confirm the equipment count is everything on location.
2. As this is a tank battery location and no wells, please confirm that drilling waste will not be stored on this location. If not, with your concurrence, I will change closed loop system to No and oil based drilling fluids to No and remove the drilling and cuttings information.
3. It looks like the location disturbance crosses NRCS Map Unit #70. I will add the description and please provide the NRCS map unit description.
4. Based on the BMPs provided, please explain if completions will be at this location or at the well location?
5. Please explain if salable gas will be from this location that a pipeline will be available or the wells will be shut in and venting/flaring will not occur.

Please let me know if you have questions or would like to discuss any of the above further.

Thank you,

Rebecca
