Operator Comments:

Ground elevation: 7157'
Laramie Energy utilizes the Trimble GNSS R1 receiver which provides professional grade positioning information. All as-built wellhead data was collected while using sub-meter corrections with the Satellite-Based Augmentation System (SBAS) which provides sub-meter accuracy in the field. The figure in the PDOP field is not the PDOP reading; it is the foot-accuracy reading.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
