Sheila,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

- 1) During my review it appears the northern portion of the proposed disturbance area will overlap onto the 51-Peetz gravelly sandy loam, 5-20% slopes NRCS Soil Map Unit. Please send me this NRCS Map Unit Description attachment and I will add it to the Form 2A.
- 2) In the Water Resources section Highpoint Operating has indicated the nearest water well is 2,643 feet from the proposed Oil & Gas Location. However, I believe the Cattle Drinker shown on the Location Drawing (and visible in the south facing Reference Area Picture) is a water well used to provide water for livestock. This well apparently was never permitted (not that uncommon for these types of wells). Therefore, I would like to change the distance to the nearest water well from 2,643 feet to 598 feet (the distance given on the Location Drawing).
- 3) A review of the Location Pictures indicates that there are two East facing pictures and no West facing picture. I suspect one of the East facing pictures is mislabeled. Please review and provide me with a revised Location Pictures attachment that show views of the proposed Oil & Gas Location from all four cardinal directions.

Please respond to this correspondence by September 10, 2018. If you have any questions, please contact me. Thank you.

Doug –

Attached please find the following documents:

- 51-Peetz Gravelly Sandy Loam, 5-20% Slopes NRCS Soil Map Unit
- Location Photos – Correcting the Photo Label on Photo Page 3 to Westerly

For #2 below, please change the distance to the nearest water well from 2,643 feet to 598 feet.

Thank you for attaching the revised documents and making the change to the nearest water well. If you have any questions or need any additional information, please don't hesitate to contact me.

Sheila
