NATURAL GAS CATEGORY DETERMINATION

Date Application Filed 6-29-84 Date Complete 6-29-84 Filing No. 84-1213

Applicant/Operator Name and Address:

Amoco Production Company
ATTN: G. S. Geslin
Amoco Building
Denver, CO 80202

(13)

Well Name and Number: UPRR 22 Pan Am "G" #1 API #: 05-123-7848

Reservoir: "J" Sand Field Name: Wattenberg

Location: Sec. SWSW 13 Twp.: 3N Range: 66W Mer.: 6 p.m.

County: Weld

Category Determination Requested: Section 108 (temporary pressure buildup)

Category Determination: Affirmative Negative*

The following information and reference materials are being submitted to FERC with this determination:

- List of participants thus far including the applicant and all parties submitting comments on the application. See Application
- A statement on any matter being opposed. None
- A copy of the application and all materials required under Part 274, subpart B. A copy or description of materials as required by 274.104(a)(4), amended 8/1/79.

*In the case of a negative determination, only a copy of the determination and a copy of FERC Form 121 will be forwarded to FERC. If the applicant or any aggrieved party so requests within 15-days of a negative determination, all information referenced in 1 thru 3 will be forwarded with the determination to FERC in accordance with 274.104(b).

A jurisdictional agency determination is hereby made that the natural gas referred to above does/~~does not~~ qualify as natural gas produced from a stripper gas well in accordance with the applicable provisions of the NGPA.

William R. Smith
 William R. Smith, P.E.
 Director

Date: FEB 1 8 1985

The Jurisdictional Agency determination was based on information contained in or added to the Application. Review by the professional staff of the Colorado Commission indicates that this well is an (~~New~~) (Old) well. The well produces from the "J" Sand reservoir(s); This well qualified as a

stripper well under Filing No. 83-593 . The well produced non-associated natural gas at a rate exceeding 60 Mcf per producing day for the "90 day" period ending January 31, 1984 . Production from the well was 541 Mcf during the "90 day" period. A petition for "Temporary Pressure Build-up" was subsequently filed showing that the well was temporarily shut-in 89 days.

This conclusion was originated by examination of the contents of the petition.

Which show this well increased daily average production due to temporary pressure build-up when shut in due to pipeline demand and therefore qualifies as a "Temporary Pressure Build-up stripper well under FERC Rule 271.804(e).

Therefore meets the qualifications of a (108) well as defined in the N.G.P.A.
