Subject: Cuttings Management - TEP Rocky Mountain LLC MV 60-8D Form 2A - Doc # 401678650

Importance: High

Dave,

Thanks for the conversation yesterday and earlier today regarding the options for transporting cuttings.

Regarding the MV 60-8D Form 2A (Doc # 401678650), we are agreeable to a Condition of Approval that TEP will submit and receive approval of a 502.b. Variance to transport drill cuttings from the MV 60-8D to the GM 41-8 pad (Form 2A Doc # 401705444 is In Process) and the approved Hayes Cutting Trench (Location ID 436797). Per your direction, we will submit a Form 4 Sundry Variance request for the pending GM 41-8 upon approval of the Form 2A (Doc # 401705444) that includes a Waste Management Plan. Additionally, TEP will submit a Form 27 detailing plans for remediation, sampling and final reclamation on the GM 41-8, per your direction.

We are scheduled to spud the first well on the MV 60-8D in early November and must begin construction soon to meet this timeframe.

Please let me know if you require any additional information to approve the Form 2A for the MV 60-8D.

Thank you,

Jeffrey D. Kirtland, MScM
