Operator Comments:

After GIS search for available water sources was completed, there was 1 potential Division of Water Resources available water resources in the search area. According to that water well's documents, it is actually in the NWNW of Section 6, putting it outside of the search area. The DWR's GIS point is located incorrectly. Because of this, it has been determined there are no available water sources within the required search area for the Bost Farm 5-7 Pad and its wells. See available water source search area map and available water source search table which are both attached to this document.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
