Field Inspector Assigned: Adam Kraich

Complaint Received:

Date: 8-30-2018

Complaint Contacted:

Date: 8/30/2018 @15:34

Location #: 447752

Inspection Document #: 691300497

Nature of complaint: Air Quality

Field Inspector Actions:

On 8/30/2018, I received a complaint in regard to an air quality compliance issue, suspected to be coming from the Norden HZ location, owned and operated by Anadarko Petroleum Corp. The complaint was accompanied by a video produced by the complainant, which appears to show "venting" of equipment, at an unidentified location.

On 9/5/2018, I performed a site inspection, I found the location, and more importantly the well pad itself to be in the stages of placing equipment in anticipation of flow back operations. Although no such operations had begun at the time of my inspection. The video shows what appears to be a wireline stack, no such equipment was on location at the time of inspection.

I made contact with APC regulatory personnel, and shared the video produced by the complainant. Upon review, it has been determined the vapors on the video are in fact water vapors from a hydrostatic pressure test. The pressure test in standard operating procedure, and takes place before entering the production casing.

No violation of COGCC rules were observed at the time of the inspection.

All information reviewed and site inspection information were submitted to the complaint specialist for further review.
