| 1 | the short 4 page report on extractions oil spill and there conclusion of unknown cause - please do not approve the permits so the cause of the spill can be determined - as this an example of broomfield wanting to protect the health and safety of their citizens - especially since the pad is going to be so close to our drinking water reservoir - the short report from extraction with unknown cause is what we're up against - how can they be held accountable to help prevent this from happening again - and I am sorry how many causes could there be - default in equipment or mistake by employee? Bottom line the oil spill is there responsibility - but would rather say there is an open investigation - fine another reason to not approve permits. If the COGCC, approves the permits, than we do not have an independent agency of oil and gas, and leaves me with little hope as it shows local government does not matter, lawsuits and judgements do not matter, health and safety of broomfield does not matter, how many concessions do we have to make? I know fracking is going to happen but please do not ignore broomfield residents and our concerns. | 02/28/2018 |
