RE: Rule 306.e. Meetings with Building Unit Owners within a Buffer Zone  
Setback.  
Chalk Seeley 7-26 Pad: SWNE Section 26-T6N-R66W  
Weld County,  
CO

Dear Ms. Murphy,

SRC Energy hereby certifies that it has complied with Rule 306.e, which states that an Operator shall be available to meet with building unit owners who received an OGLA notice or a buffer zone notice pursuant to Rule 305.c. and requested a meeting regarding the proposed oil and gas location.

On May 16, 2018, SRC met with Mr. & Ms. Reichel, Mr. & Ms. Vandergon and Mr. & Ms. Ruiz. During the meeting SRC discussed the following mitigation measures: dust, lighting, security, sound and visual as well as timing associated with the operations. In conclusion, SRC has agreed to place temporary sound walls on the south, east and southwest sides of the operation to provide for security, sound and visual mitigation to the homes to the south and southeast during activity. In the similar discussion, SRC has also agreed to place permanent sound walls around the compressors at the facility once the wells have been placed in the production phase. While the haul route(s) to and from this site are located on paved roads, SRC has agreed to monitor the access road south of AA Street for any fugitive dust and treat with water and/or magnesium chloride during operations. Lights will also be placed on the inner sides of the temporary sound walls and pointed in a downward direction.

Thank you,

*Erin Ekblad*
