Re: 2800 (COS09000)  
COC61214

Dear Ms. Stevens,

In response to your letter regarding the Roan Creek ROW, Maralex submits this plan to be competed in order to bring the evaporation pond into compliance.

1. Remove the damaged liner.
2. Remove and dispose of any contaminated soil within the boundaries of the evaporation pond.
3. Install a new liner that meets all Federal and State regulations.
4. Install a properly functioning leak detection system that includes a function test feature.
5. Reclaim the eroded areas, bring berm into compliance, and recontour and reseed the affected areas with pre-approved seed mixtures.
6. Reclaim the bioremediation site by removal of stock piles of soil, soil preparation for seeding, and reseeding with pre-approved seed mixture.
7. Keep the evaporation pond and ROW in compliance with state, county, and local requirements.

A schedule of the work will be submitted via the appropriate forms for each regulatory organization.

Please let me know of any questions.

Thanks,

Jordan Reid
