<p>Comment: Erosion and sediment deposition is occurring in the northwestern project area where stormwater run-on is scouring the northwestern interim reclamation area slope and diversion. Erosional tunnel is forming in the eastern well pad where concentrated stormwater settles on the well pad near the cobble run-down. Armoring on culvert at well pad entrance appears to be functioning.</p> <p>Corrective Action: Erosion and sediment controls are needed in the northwestern project area to de-energize run-on and reduce sediment flows. Erosional tunneling in eastern project area needs repair and stabilization.</p>						<p>Date: 10/26/2018</p>
<p>Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT</p>
