**General Comment:**

COGCC Inspector met with the Anadarko contract supervisor (from Nail Services) on location; crews are in progress of removing all flowlines associated with this well and facility. This well has been plugged and abandoned; form 42 notice of start of plugging operations Doc #401726631 was received on 08/07/2018. Details are available in the flowline section of this report. Photos uploaded.

<u>Comment:</u>	The off location wellhead flowlines (1) 2" carbon steel and (1) 1" poly flowline running approximately 1700' south from the wellhead to facility have been removed. The associated dump lines and process pipe (at facility) are being removed (2- 40' sections of 2" cs dump flowlines routed under existing tank berms are being abandoned in place/ solid filled with cement). Asbestos coating found on flowlines at the facility is being addressed by a separate contractor (abatement crew) and handled/ disposed of according to regulations. The facility (decommissioned/ equipment and tanks removed) is on a shared location (KPK); work is being conducted to avoid the other operations.
