**General Comment:**

Inspection of Flushwell 1 is for OWP program to assess current conditions of De Beque Orphan wells prior to commencing P&A operations. On site with COGCC engineers, Craig Burger and Shannon Chollett. Weather clear, 75 F. Extremely dry condition for both September and annual. Well has similar conditions to prior inspections. Well is flowing gas and water is bubbling but no fluid discharge or runoff. Iron staining indicate previous runoff. Ground is bare and solid around wellhead. Well is fenced with T-posts and two-strand barbed wire. Access is via rough road bulldozed to location by landowner.
