General Comment:

Inspections for OWP program to assess current conditions of De Beque Orphan wells prior to commencing P&A operations. On site with COGCC engineers, Craig Burger and Shannon Chollett. Weather clear, 75 F. Extremely dry condition for both September and annual. Well has similar conditions to prior inspections. Well is flowing gas and water bubbling but no discharge or runoff. Casing is ~1 foot above ground with 1 inch rod protruding which will require fishing. Water level is ~2ft bgs. Well is not fenced. Solid ground around wellhead. Access is via rough road bulldozed by landowner.
