General Comment:Canfield 1

Inspections for OWP program to assess current conditions of De Beque Orphan wells prior to commencing P&A operations. This well is on Chevron property but is a tenant-leased farm. Well is ~ 400 ft NW of farmhouse adjacent to vegetable garden and within livestock grazing pasture. On site with COGCC engineers, Craig Burger and Shannon Chollett. Weather clear, 75 F. Extremely dry conditions for both September and annual. Well has similar conditions to prior inspections. Well is flowing gas and water but runoff terminates within 100 ft west of wellhead. Wellhead area is saturated ~ 50 ft in diameter. Marshy vegetation around wellhead. Casing is at ground level/submerged. Well is not fenced. Access is via dirt farm road through residential entrance.
