Phase 3	Well Pad Construction	40
Project Completion	Start 9-20 End 10-5	20.3

Construction Activities

Item #	Description
1	Began and completed install of silt fence per spec and corrective action request from the COGCC rep.
2	Continued ripping cuts and installing lifts on eastern side of well pad.
3	Completed installation of perimeter well pad fence.

Noteworthy Events:

1. Scrapers shut down due to lack of material in the cut due to sandstone vanes
2. Western edge of well pad expanded west to allow for additional fill material

Upcoming Schedule:

Continue adding lifts and removing rock from cuts

Health, Safety and Environment:

Reviewed JSA with contractor and signed

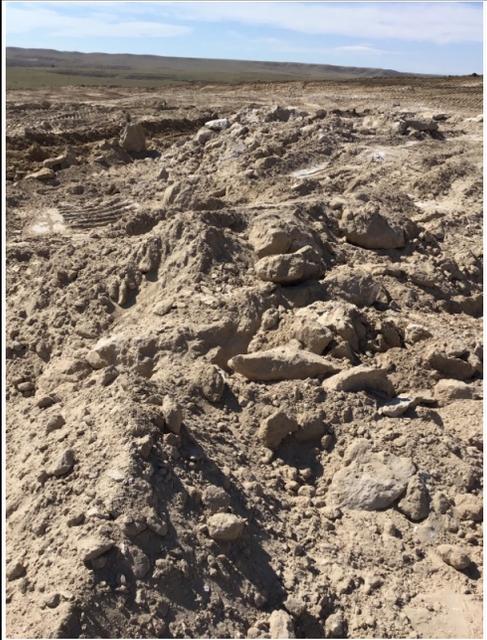

Change Orders: (date first reported)

1. Excavator and hammer attachment to be onsite 9-28
2. D-9 Dozer with dual shanks to be onsite 9-28
