Ms. Burn,

Per our phone call, here is the follow up email for the RSU Anschutz Fed 4-62-11-1609CS (05-123-46846). WBD attached. Let me know if you need anything else.

- While drilling at 10,599 MD, the drill string pressured up. We spent an hour trying to work the pressure down thinking it was plugged jets in the bit. The decision was made to trip out of hole to check the BHA. Once the BHA was on surface, we found that the motor had parted just above the bend in the motor leaving the bit, lower end of the motor, and rotor down hole. Due to this fish being extremely hard to fish, the decision was made to sidetrack around the fish in hole.
- The total MD of the hole to be abandoned is 10,599' MD.
- 9 5/8" surface casing is set at 838' MD.
- The fish in the hole is a bit, lower end of the motor, and rotor at 10,599 MD.
- There are no proposed cement plugs.
- Sidetrack KOP is 8545' MD.
- The objective formation for the sidetrack hole is the Niobrara formation, which is the same objective formation as the wellbore being abandoned.
- The PBHL of the sidetrack hole is the same as the wellbore being abandoned.

Best Management Practices

<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Drilling/Completion Operations	HighPoint will adhere to the COGCC Policy for Bradenhead Monitoring effective 5/29/12.
2	Drilling/Completion Operations	One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
