TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment:

<p>The majority of the Location, both the North & South Sections have little evidence of any desirable emerged species. There are vast areas of bare ground and a infestation of Russian thistle. Some metal debris (cable, piping) has not been removed. In areas much of the straw mulch has not remained in place but blown into piles. The reclaimed access road does have some establishing vegetation, but should still be included in Location vegetation assessment. Operator is encouraged to continue monitoring of site after completion of CAs, until site is ready for Final Reclamation Inspection.</p>		Date 11/30/2018	
Corrective Action:	<p>There are three CAs in this Section. CA#1) Remove debris from Location. CA#2) Assess vegetation in Fall 2018; reseeding / inter-seeding/ applying remedies as indicated where desirable vegetation is not Progressing. CA#3) Control Weeds</p>		
Overall Final Reclamation	In Process	Well Release on Active Location <input type="checkbox"/>	Multi-Well Location <input type="checkbox"/>
