# REMEDIAL ACTION PLAN

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The source was removed from the location through excavation of impacted soil above COGCC Table 910-1 standards. A third party environmental consultant collected laboratory confirmation sampled to determine the final extent.

## REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Limited groundwater was observed at the base of the excavation. A groundwater site assessment will be scheduled to determine if groundwater is present at the location and if impacts above COGCC Table 910-1 standards are present.
