Operator Comments:

Per Stephen Wolfe, 12/22/2017, this Sundry is requesting to remove the COA on the permit per the following: 1) John Weigandt Gas Unit 1, API 05-001-06972, NB-CD, JSND with sufficient NB coverage. I think that given the distance and the direction of the water well to the offset well and the plug in the offset well this one should be ok as is for the frac. I have asked K-M when the plug was installed, not listed on the 6(N) in process.

This Sundry is requesting to remove the COA

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Engineer	Offset well John Weigandt Gas Unit 1, API 05-001-06972 has sufficient cement coverage over the Niobrara and aquifer isolation. COA has been satisfied. COA is not removed from this APD. Position relative to the water well is not an issue. Offset well has since been P&A.	10/19/2018
