VEGETATIVE COVER _____

Comment:

	<p>Previous inspections documented that the former battery and well location has not been reclaimed in accordance to COGCC 1000 series reclamation rules. Corrective actions from inspections required operator to remove meter shed equipment in accordance to 1004.a by 8/3/2017 from the battery, and to perform reclamation at both the well and battery by 11/15/2017. Operator submitted sundry doc. #401667370 showing equipment is still in use. Unable to find evidence that reclamation activities have been conducted at well location; well remains bare and exposed soil or predominantly undesirable weedy plant species. CA and CA date remains applicable.</p>	
Corrective Action:	<p>Perform reclamation at the well in accordance to COGCC 1000 series requirements and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation passes. Revegetation activities shall be complete no later than 11/15/2017</p>	Date 11/15/2017
Overall Final Reclamation	Fail	Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
