Operator: BP Production

API: 05-067-07843

Date: 10/05/2018

**Photo 1. View of the project area from the southwestern corner facing center.**

**Photo 2. View of the northern project area from the northwestern corner facing eastward. Revegetation is progressing within the interim reclamation areas with shrubs such as rabbitbrush (*Chrysothamnus nauseosus*), and grasses such intermediate wheatgrass (*Thinopyron intermedium*).**

**Photo 3. View of the eastern project area from the northeastern corner facing southward.**

**Photo 4. View of the southwestern portion of the project area. Erosional channels and deep rills are forming within the cut-slope. Exposed roots are visible.**

**Photo 5. View of erosional channels in the southwestern cut-slope, approximately 2 to 3 feet wide and deep.**

**Photo 6. View of diversion ditch from western and southwestern cut-slope, full of sediment and not properly stabilized.**

**Photo 7. View of cobble run-down in the southeastern project area that appears to be functioning.**
