Comment:

The TPZ footages are estimates calculated through Directional Plotting Software—from where the production string (5 ½" casing) crosses the 460' setback hardline. The actual footages will be submitted with the Form 5A.
No open hole resistivity log with gamma ray was run on this well.
DIL ran on Rinn Valley East N17-20-15C (123-47175)
Surface Lat/Long updates will be submitted via sundry.
The Rinn Valley pad had two different rig operations, therefore, there are different rig release dates.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
