# REMEDIAL ACTION PLAN

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The soil samples from the pit did not provide any indication of hydrocarbon contamination or inorganic constituents above the COGCC standard. No material is to be removed from the pit.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

No impacts to soil were indicated in analytical results from soil samples collected from the Kettl pit. Visual impacts to soil were not observed at the time of sampling and the pit was full of plant life.

## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The soil material surrounding the pit (berms) will be pushed into the pit bottom. Backfill material from a local source will be brought to location to bring the pit area to grade after compaction. Compaction will be done with the equipment brought in to backfill the pit. Recontouring of the area will be done to return it to its natural topography.

Is the described reclamation complete? ☐ Yes \_\_\_\_\_
