CORRECTIVE ACTIONS:

1 CA# 117721

Corrective Action: Securely fasten all valves, pipes, and fittings to ensure good mechanical condition, inspect at regular intervals and maintain in good mechanical condition per Rule 605.d. Control and contain spills/releases and clean up per Rule 906.a. Contact COGCC EPS staff.

Date: 08/02/2018

Response: CA COMPLETED

Date of Completion: 09/10/2018

Operator Comment: Kris Neidel was contacted concerning the fresh water seepage at the wellhead. The wellhead was dug out Monday Sept 10 2018. Three abandoned lines were found and all 3 had fresh water seeping from them. One of the lines was a short piece of pipe and was pulled up. The other 2 lines were dug out and cut off as close to the road and as close to the operating pumping unit, as was prudent. Both lines were capped and welded. The excavated area around the wellhead was left open 24 hours. There was no evidence of any water seepage the next day. The excavated area was back filled with clean road base material Tuesday Sept 11 2018. As of Friday Oct 19 2018 the area around the wellhead still remains dry.
