NOW, THEREFORE, for and in consideration of the mutual covenants and agreements of the Parties herein contained, and other good and valuable consideration, the Parties agree as follows:

1. Grant of Access. Owner hereby grants Company the right of ingress and egress to, over, upon, through, across and under the Lands, and all rights related to access and use of the Lands as are necessary to explore, develop, produce and market oil, gas and associated hydrocarbons underlying the Lands, including, but not limited to, the right to: (a) locate, drill, complete, operate, and maintain Wells (defined in Section 2.4 below) and associated Well Pads (defined in Section 2 below) on the Lands; (b) construct and operate access roads, Pipelines (defined in Section 4 below), and utility lines to the Well Pads; (c) construct and operate equipment and facilities related to the operation of the Wells; and (d) re-inject fluid and/or gas in connection with exploration and production of oil, gas and associated hydrocarbons underlying the Lands.

2. Wells and Well Pads. Company may construct well pads for drilling, completing, re-completing, reworking, re-entering, producing, maintaining, and operating Wells (“Well Pads”) on the Lands subject to the following terms and conditions:

2.1. Vertical Well Pads. All Well Pads for vertical Wells shall be limited to approximately five (5) acres of land while drilling and no more than two (2) acres for permanent facilities.

2.2. Directional Well Pads. All Well Pads constructed for Directional Wells shall be limited to approximately ten (10) acres of land while drilling and no more than five (5) acres for permanent facilities. “Directional Well” means any Well that is directionally drilled with a horizontal wellbore length of at least one thousand (1,000) feet.

2.3. Well. As used in this Agreement, “Well” means a well and the accompanying wellbore (either vertically or directionally drilled from the applicable Well Pad) for the production of oil, gas, associated hydrocarbons, and other leased substances and all associated casing and wellhead equipment.

3. Roads. All roads constructed on the Lands shall be approximately twenty (20) feet in width, being ten (10) feet on each side of the center line of the road.

3.1. Use of Existing Roads. Company shall endeavor to use existing roads for its operations on the Lands. If Company determines that construction of a new road is required, Company shall use reasonable efforts to minimize surface damage to the Lands during construction of the road.

3.2. Road Maintenance. Roads used by Company shall at all times be properly graded and maintained during the Term (defined in Section 5) of this Agreement.

3.3. Speed Limit. Company shall abide by a fifteen (15) mile per hour speed limit when using roads located on the Lands.

4. Pipelines. All Pipelines constructed on the Lands shall be buried to a depth of at least forty-eight (48) inches. Following construction, Company shall provide Owner an as-built diagram for each Pipeline. The term "Pipeline" includes all pipelines used for: (1) the removal of oil, gas, petroleum products, water, and any other substances recovered during Company's operations on the Lands, and (2) the movement of water for oil and gas operations on the Lands. During the Term of this Agreement, Company shall provide for the maintenance and repair of all such Pipelines.

5. Term. This Agreement shall terminate upon the later of (i) the expiration of the Leases, or (ii) the date that is five (5) years from the Effective Date ("Term"). Company shall have access to the Lands for a period ending six (6) months after the Term to complete all required plugging and reclamation operations. In the event of adverse surface conditions, Company will have access to the Lands for so long as is reasonably necessary to perform all plugging and reclamation operations.

6. General Operational Requirements.

6.1. Operations. Company's operations on the Lands will be conducted pursuant to the terms of the Leases, this Agreement, and the Rules of the Colorado Oil and Gas Conservation Commission ("COGCC"). Company shall diligently and reasonably conduct its operations, and shall: (a) keep those portions of the Lands used by the Company free from litter, debris, junk and refuse; (b) keep those portions of the Lands used by the Company free of noxious weeds; (c) employ appropriate measures to prevent wind erosion, dust, and loss of soil on those portions of the Lands used by the Company; and (d) minimize noise and light from Company's operations on the Lands.

6.2. Water Flow. Company will install culverts as necessary to maintain present drainage on the Lands.

6.3. Fences. During drilling operations, Company shall fence Well Pads and pits located on the Lands. Company will install cattle guards and/or gates where reasonably necessary.

Company shall notify all of its employees, agents and contractors entering the Lands on Company's behalf that no firearms or other weapons will be allowed on the Lands.

6.6. Irrigation Systems. No Wells, Well Pads, tanks or related facilities, Pipelines, roads or other operations conducted under the terms of this Agreement will interfere with Owner's use of any existing irrigation system located on the Lands as of the Effective Date ("Irrigation Systems"). If Owner is prevented from utilizing Irrigation Systems as result of Company's use of the Lands, Company shall compensate Owner for crops lost (including crops lost on adjacent parcels owned by Owner) as a result of Owner's loss of use of the Irrigation Systems.

7. Reclamation. Within six (6) months after the termination of this Agreement (or as soon as is commercially reasonable in the event of adverse surface conditions), Company will reclaim the Lands in accordance with COGCC Rules.

8. Owner's Water. Company shall not use any water from Owner's existing water wells or reservoirs on the Lands without Owner's prior written consent. Company shall not disturb or interfere with any source of water on the Lands without Owner's prior written consent.
