Rick,

Extension granted - please provide the results no later than 7/19/08.

Thanks for the update.

**Subject:** Bowman Sample Results

*John;*

*I spoke with Cardinal Laboratories today checking on the results of the samples we took to them from the Bowman 3B-28-5-44 SWD and also the Bowman 13-22 facility. When SAR results are needed this lab sends them to another, as they are not set up to do this. This creates a delay in receiving the results. I requested a time frame and was told I should have them "next week".*

*The "Corrective Action Required" date is 7-5-08. I am concerned that the delay from the lab may interfere with this date, so I am requesting an extension. I requested that the results be sent to me email so that I can send them immediately to you.*

*Thank you for your consideration in this matter.*
