OPERATOR COMMENTS AND SUBMITTAL

Comments

The distance to the completed portion of the nearest well on the "Spacing & Formations" tab was measured to the Schlotthauer 23E-20-12N well in 3D via the attached anti-collision report because when viewed in 2D via the COGCC website, the Hirsch 14-24, Hirsch 19-24, Schlotthauer 3-26 and Schlotthauer 4-26 appear to intersect the proposed wellbore but are actually 637', 1184', 719' and 298" away, respectively. The distance to the completed portion of the nearest well belonging to another operator on the "Drilling & Waste Plans" tab was measured to James P Sloss's Nashland 1 well (P&A). Both distances were measured in 2D via COGCC GIS Mapping.

The surface owner has waived COGCC Rules 318A.a. & 318A.c. Please see signed Surface Location Exception Request Letter attached and Exception Location Waivers highlighted on page 4 of the attached SUA.

Best Management Practices

<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Drilling/Completion Operations	Anti-collision: Operator will perform an anti-collision evaluation of all active (producing, shut in, or temporarily abandoned) offset wellbores that have the potential of being within 150 feet of a proposed well prior to drilling operations for the proposed well. Notice shall be given to all offset operators prior to drilling.
2	Drilling/Completion Operations	Operator acknowledges and will comply with COGCC policy for Bradenhead Monitoring during Hydraulic Fracturing treatments in the Greater Wattenberg Area dated May 29, 2012.
3	Drilling/Completion Operations	317.p One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
