Comment

Operator has performed the previous corrective action to reduce disturbance areas only needed for production operations; however, little to no desirable vegetation was observed throughout the interim area. Operator will need to perform additional reclamation activities to bring this location into compliance with Rule 1003 standards. COGCC Staff recommends performing additional reclamation activities by 11/30/18. Appears the Operator mowed the interim area. Operator shall continue to monitor and manage this site until the location meets Rule 1003 standards, including weed management. Refer to the attached inspection photos.

COGCC Comments

Comment	User	Date
COGCC Staff will conduct a follow-up inspection during Spring of 2019. If vegetative conditions remain the same (i.e., lack of desirable vegetation), Staff will issue a corrective action to perform additional reclamation activities (i.e., at a minimum reseed).	binschusc	10/30/2018
