# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Soil excavation based on staining, odors and final lab analytical results was conducted at the location of the former produced water vessel during October 2014.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Based on the soil analytical results obtained at the site, impacted soils at the Clyde E Williams 2 production site were present in the water production pit area. Following soil excavation, final soil sampling activities conducted on October 27, 2014 and October 6, 2015 confirmed that impacted soil has been removed from the spill area and remaining soils do not contain TPH or BTEX values greater than Table 910-1 concentrations.
