081-06829	PIT	100044	AC	1996 Pit Inventory (doc 2142995); Related well lists an active pit on 1998 Status report (doc 2142998); 1996 Sundry Notice (doc 1742780) in Pit file indicates abandonment; 1998 Sundry (doc 657363) indicates pit is present next to condensate tank; field inspection from 1999 indicates pit present with oil on surface. Pit is visible in 1994 through 2011 aerial images, gone in 2014.	Pit was closed between 2011 and 2014 without prior approval of a Form 27 as required by Rule 905; status changed to AC. Operator must submit a Form 27 and conduct a subsurface investigation in pit area to document proper closure in accordance with 900 series rules.		
081-06829	PIT	100045	CL	This pit was incorrectly assigned to this well based on Name not API number; appears in Tom Brown Pit Inventory data below well with same name.	COGCC administratively change the pit back to 077-08463 and move to Mesa County; based on record review, pit was closed by Tom Brown in 1998 status changed to CL.		
081-06242	PIT	100064	NS	Related well lists an active pit on 1998 Status report (doc 2142998); 2000 Inspection indicates (dry) pit present onsite; Pit is visible in 1994 through 2006 aerial images, possibly remaining in 2009, gone in 2011.	Obtain records from operator regarding closure to establish closure date; operator submit Form 27.		
081-06199	PIT	100066	NS	1996 Pit inventory indicates "no pits associated with this well"; 1997 & 1998 status reports state "No Pit"; 1994 sundry indicates water will be injected into a disposal well; 1992 Lease Inspection Form (doc 288934) indicates a 15' diameter skim pit near production tanks and a 25' diameter disposal pit 15' south of heater treater; 1999 Field Inspection Report (doc 200002971) indicates 1 PW pit with oil on it; 1994 Google Earth image shows apparent pit on pad northeast of tanks and possible pit or tank in containment dike, 2005 GE image shows no pit on pad round pit or tank in dike, no other clear imagery, until 2014 clearly no pits; COGCC GIS Online also indicates Pit Facility 116607 (Chevron "FLB 14-2") in the qtr-qtr.	Pits present during 1992 and 1999 inspections were likely removed from service and replaced with 1 PW tank which was later removed. Possible closure of PBV between 2006 and 2014. Request records from operator, could request Form 27, insufficient data for administrative closure.		
081-06199	PIT	100069	NS	See 100066	See 100066		
081-06153	PIT	100072	AC	1996 pit inventory lists "2 pits = 300 bbls"; same on 1997, 1998, pit status reports; 1999 Field Inspection report (doc #500154532) notes 1 oil covered production pit; 2000 inspection indicates 1 PW pit w/oil; 1 pit is clearly visible in 1994, 2005 & 2006 Google Earth Images; also visible in 2009 COGCC GIS Online aerial image; 2nd pit never clearly visible.	1 pit is verifiable on location after rules require Form 27 for closure; submit Form 27 for subsurface investigation at pit location; COGCC move 1 pit to approximate coordinates and change status to AC, administratively close 2 others.
