

BRADENHEAD TEST REPORT

Step 1. Record all tubing and casing pressures as found. Step 2. Sample now. If intermediate or surface casing pressure > 25 psi. In sensitive areas, 1 psi.
Step 3. Conduct Bradenhead test. Step 4. Conduct intermediate casing test. Step 5. Send report to BLM within 3 days and to OGCC within 10 days. Include wellbore diagram if not previously submitted or if wellbore configuration has changed since prior program. Attach gas and liquid analyses if sampled.

Comments: Bradenhead test was performed on the State of Colorado #3-33 as a COA of the well's Form 2. No pressure was observed (initial slight vacuum). Stimulation has been delayed pending gas sales. Bradenhead will be checked prior to any fracture stimulation. Rig release date for the well was 10/4/2018 placing this bradenhead test within the 60 day window of the COA.
Original PDF version of the Form 17 can be found attached to COGCC inspector report for the bradenhead test. No attachments are allowed on the electronic Form 17.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
