Comment

Interim reclamation in process. It appears some topsoil has been replaced on the west end of the location however pits remain open and no additional reclamation appears to have been conducted on areas no longer reasonable needed for production on the south, east and northern ends of the location. Records show well PR 7/4/2018, COGCC reclamation rule 1003 requires interim reclamation to be conducted within six (6) months on non-cropland after drilling operations, interim reclamation activities will need to be conducted by 1/4/2019.
