Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On September 24, 2018 at around 4 pm, a surface owner notified the emergency number of an oil stain on surface right next to the header. The surface owner also called 911 and the Fire Department was on location. The Fire Department conducted a gas analysis in the nearby area and indicated that there was no gas present and that it was safe to excavate to clean the contaminated soil. All the wells connected to the header were immediately shut-in and a crew was mobilized to location the next morning.
