Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

Yes	SOILS	Impacted soils	Sampled

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Impacted soils were taken to the tank battery and put into a permitted earthen berm containment area.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Soil samples were taken from the remediated pile located in the permitted earthen berm containment pit by Wesco to be analysed for disposal at an approved landfill.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Since work began in August, 2018, Wesco has removed and disposed of the soil stockpiled in the former lined soil reclamation site. The liner beneath the staging area was also removed and disposed of at the Rio Blanco County landfill. Wesco has also excavated contaminated soil from beneath the former liner. Approximately 1,900 tons of soil has been removed and disposed of at the Rio Blanco landfill. This includes the material that was stockpiled on top of the liner. Wesco may conduct additional remedial work either this fall or in the spring of 2019 as weather and landowner access allows work to resume. The COGCC will be notified in advance of any soil sample collection that will be used for approval of excavation closure. The open excavation is currently fenced to prevent wildlife entry. Wesco anticipates that all excavation and backfill work for this project will be completed in 2019, in advance of the March 6th, 2020 compliance date stipulated in the administrative order.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Wesco will be disposing of material at an approved landfill facility due to the cost of remediation.

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

Do all soils meet Table 910-1 standards? _____

Does the previous reply indicate consideration of background concentrations? _____

Are the only residual soil impacts pH, SAR, or EC at depths greater than 3 feet below ground surface? _____

Does Groundwater meet Table 910-1 standards? _____

Is additional groundwater monitoring to be conducted? _____

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Wesco will be disposing of material at an approved landfill facility due to the cost of remediation. Wesco Has been approved by the landfill to dispose of the contaminated soils and is currently in progress of disposing the contaminated material.

Is the described reclamation complete? No

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim? ☐ Final?

Did the Surface Owner approve the seed mix? _____

If NO, does the seed mix comply with local soil conservation district recommendations? _____

Description

	The facility should be kept free of fluids that may migrate contamination.
	Haul tickets should be submitted on supplemental Form 27's.
	A project update with start dates should be submitted by May 1, 2019. Until then, COGCC approves Wesco's request to stop sending in monthly reports.hunt

Attachment Check List

Upon approval, the approved Form 27 and all listed attachments will be indexed to the Remediation Project file. Only the approved Form 27 will also be indexed to the related Facilities.
