Dear Director Murphy,

Noble Energy, Inc. (Noble) plans to drill six (6) wells on the D22-15 Pad as referenced above. The surface locations of Noble's proposed wells have been staked outside of the Colorado Oil & Gas Conservation Commission (COGCC) Rule 318A.a. Greater Wattenberg Area Drilling Window and are being permitted as exception locations.

Rule 318A.a. requires surface locations within a square with sides four hundred (400) feet in length, the center of which is the center of any governmental quarter-quarter section ("400' window"); or within a square with sides eight hundred (800) feet in length, the center of which is the center of any governmental quarter section ("800' window").

Rule 318A.c requires a new surface location to be less than 50' from an existing surface well location. The above referenced wells are proposed at a surface location approximately 308' E - 435' E of the nearest oil and gas well (Spike ST GWS D 22-4J API: 05-123-16068).

Noble has obtained written permission from the surface owner by way of Surface Use Agreement. These wells were located outside of the GWA Window due to a negotiated SUA with the surface owner.
