Comment:

Form filed to reflect recompletion to the J Sand formation performed by the previous operator in 1992. It is believed that without any stimulation of this new formation very little to no new additional production would be or was realized. Renegade is now considering a large fracture stimulation of this formation. This Form 5A is being submitted at the request of the COGCC.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
