Comment:

This Form 5A is for a refrac performed on 8/4/2011. No production test was run for the Codell refrac. The previous Great Western 26-23 Form 5A (Doc # 1737966) incorrectly reported the total number of holes shot in the Niobrara. The correct number shot in the niobrara was 144. A comingled Niobrara tab has been added to this Form 5A to account for the correction. After the 80 perf Codell refrac, the total number of holes shot in the entire well is 304.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
