Mineral Lease: Fee

Dear Surface Owner:

As you are aware, the below referenced wells were previously staked on your surface at the referenced locations in Sec. 6 T7N R64W. Confluence DJ LLC (Confluence) intends to apply to the Colorado Oil and Gas Conservation Commission (COGCC) for Applications for Permits to Drill the below referenced wells at the described surface locations. COGCC Rule 318A.c.(2) stipulates that a Greater Wattenberg Area (GWA) well surface location shall not be greater than 50' from an existing well. As planned, these surface locations are greater than 50' from an existing wells. As you are aware, the surface locations were chosen in concurrence with your wishes, as the surface owner, and due to topography.

In addition, COGCC Rule 318.A.a stipulates that a GWA well surface location must be within a 400' by 400' drilling window centered at the center of each quarter-quarter section, or inside a 800' by 800' drilling window centered at the center of each quarter section. The northern wells on the pad fall outside of these drilling windows. As you are aware, the surface locations were chosen in concurrence with your wishes, as the surface owner, and due to topography.

The below referenced wells do not conform to these drilling windows (Rule 318.A.a) or the Twinning Rule (Rule 318A.c(2)).
