Engineer	Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well's surface hole location. This information was used in addition to locally-available geophysical logs and hydrogeologic information to evaluate the adequacy of the operator's proposed surface casing setting depth. The deepest water well within one mile is 400 feet deep at a surface elevation of ~7440'. The deepest water well within 1 miles is set to an elevation of 6670'. The surface casing must be installed to at least elevation 6620' or 409' deep. No existing offset wells within 1500' of the planned wellbore.	11/01/2018
