<p>On November 13, 2018 COGCC SW EPS Jim Hughes conducted a follow up environmental field inspection of the BP Thomas Jacquez E #1 PW Line Spill/Release Point ID #458834. For the most recent field inspection report of this facility, please refer to document #688800335.</p> <p>A temporary berm has been constructed around the excavated material being stored on the Thomas Jacquez E #1 location. The soil box cover has been closed. A track hoe was being removed from the location during this field inspection.</p> <p>The valve can immediately upstream of the release point has been reinstalled and reburied. The area where the release occurred has been backfilled. Crews were reportedly going to work through the previous weekend to finish the repairs to the produced water line. Equipment was being staged on the Dale property. The pipe bridge and matting was being prepared to be placed into the irrigation ditch to allow access to the toe of the slope where the release occurred.</p>	hughesjo	11/19/2018
