### CORRECTIVE ACTIONS:

1 CA# 120260

Corrective Action: Comply with Rule 1004. Corrective action date is being back dated to when all final reclamation activities should have been completed.

Date: 05/19/2018

Response: CA COMPLETED

Date of Completion: 11/09/2018

Operator Comment: The surface owner Confluence Resources had requested that reclamation not be done as they had plans to drill 2 wells on the disturbed area in 2018. A Form 4 variance request has been submitted (doc# 401834422) documenting the request and is also included as an attachment.

COGCC Decision: **Not Approved**

COGCC  
Representative:

The submitted variance request (Doc. #401834422) is only to leave the existing access road which does not relieve the Operator from complying with Rule 1004 for the other said areas (i.e., tank battery and well location). The corrective action date of 5/19/2018 remains the same.

This subject location (Adam Ten 1-A battery location and well location) was not part of Confluence Resources total permitted disturbance area for the Missouri Pad. Therefore, this location is currently out of compliance with Rule 1004.

This notice indicates "Corrective Action Complete", even though Crestone Peak Resources has not provided documentation that equipment has been removed and final reclamation has been completed at the tank battery and well location. Therefore, this "Corrective Action Complete" notice is not being approved.
