Tishany,

I have reviewed the referenced Form 2A Oil & Gas Locations Assessment and have the following comments.

- 1) In the Cultural Setback Distance section Verdad Resources has indicated the distance from the nearest Public Road, Above Ground Utility, and Property Line to a well is 361 feet, 338 feet, and 361 feet, respectively. A review of the Location Drawing indicates these distances are measured from Weld County Road (WCR) 100, an overhead electrical line, and property boundary all to the north. However, during my review it appears the proposed Boydston 3535-01H well is closer to WCR 105, an overhead electrical line, and the property boundary all to the west. I measure this proposed well as being approximately 260 feet from WCR 105, 250 feet from the overhead electrical line that runs along WCR 105, and 260 feet from the property boundary along WCR 105. If you concur, I would like to update these three distances on the Form 2A.
- 2) During my review it appears that the eastern portion of the proposed disturbance area will overlap onto the 31:Kim-Mitchell complex, 0-6 percent slopes and 27:Epping silt loam, 0-9 percent slopes NRCS Soil Map Units. Please send me these two NRCS Soil Map Unit Descriptions and I will add them to this Form 2A.

Please respond to this correspondence by July 12, 2018. If you have any questions, please contact me. Thank you.

Doug,

Attached are the NRCS Map units you requested below. As for the Cultural Distances I'm working on getting that.

Thank you

Hey Doug-I know it has been a while but I am just getting these emails forwarded to me.

I agree with point one below.

Also, attached are the two forms that you have requested for point two.

Let me know if you have any questions.

Thanks,

Jeff Berghorn
