Gentlemen:

It has been noted that two wells have been drilled by your company in Moffat County, Colorado. This office had no record of your company submitting an intention to drill and obtaining approval to drill. Although these wells may be located on Federal land, it is still necessary to file for approval to drill with this office, as well as submitting the proper forms upon completion of each well.

Failure to comply results in a violation of the Rules and Regulations of the Commission. Penalties for such violations are prescribed in paragraph 100-6-21 (Violations and penalties) of the Oil and Gas Conservation Commission Act, copy enclosed.

We would appreciate an early response to this matter concerning the following two wells:

1. No. 1 Wyatt, NWNW Sec. 5-11N-96 W-
spud 7-9-1961-completed 7-24-1961

2. No. 1 Martin (second request) SW SE 20-12N-96 W
spud 6-7-61, completed 7-2-[illegible].

Very truly yours,
OIL AND GAS CONSERVATION COMMISSION

Frank Pire, Assoc. Petroleum Engineer
