#### COMMENTS:

Nearest gas sales line is six miles from location and not within economical range for the amount of gas the well produces. Gas is currently being used to run heater treater and pumping unit on location. Excess gas has been run through ECD burner for approximately three years as per instructions on that date by the COGCC. This well is producing a total of 13 mcf/day. Treater uses 6 mcf/day, pumping unit motor uses 5 mcf/day, remaining 2 mcf/day to ECD burner. There are no other uses of gas at this well.
