RE: CLASS V UIC PROGRAM
Rule Authorization: Aquifer Remediation Well
HSR-Dreyer 5-5 Tank Battery (former)
SWNW Sec. 5, T1S, R65W, 6PM
Adams County, Colorado
EPA File #CO50000-11601

Dear Mr. Hamlin:

The United States Environmental Protection Agency Region 8 Underground Injection Control Program staff has reviewed the application that was submitted by you or on your behalf for the Class V aquifer remediation injection well(s) at the above referenced location. Based on our understanding of the proposed program and limited potential for groundwater contamination, we have determined that a permit is not necessary at this time. Therefore, your aquifer remediation injection well(s) is currently "authorized by rule" in accordance with Title 40 Code of Federal Regulations (40 CFR) Sections 144.24 and 144.84(a). This authorization is based on information provided in your application and is valid for:

Injections of air into 27 wells using an air sparge system on site in a manner as described in your application, and is limited to the location(s) indicated in the application that we received on February 8, 2018.

All injection wells are regulated under the UIC Program in accordance with 40 CFR parts 144 and 146, which have been promulgated under Part C of the Safe Drinking Water Act, 42 United States Code Sections 1421 through 1428. Your Class V injection well(s) is subject to periodic compliance inspections, which may include sampling and analysis of your fluids. Finally, be aware that under 40 CFR Sections 144.12(c), (d), and (e), the EPA can require you to apply for a permit or close your injection well(s) under certain circumstances.

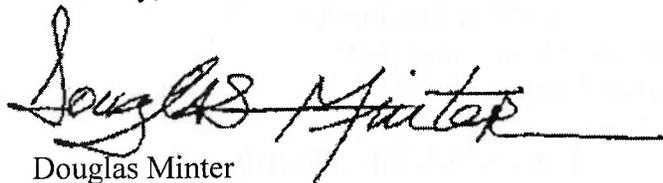

Please notify us if the potential for groundwater contamination increases. If you intend to change the proposed plan, please notify us in advance. Any changes in operating methods or any other conditions that may adversely impact groundwater MUST be approved in advance by the EPA. Failure to comply with the above requirements will result in violations of UIC regulations and possible enforcement actions and penalties.

Please be advised that this rule authorization pertains solely to the UIC Program and does NOT relieve you from satisfying any other federal, state or local regulations that may apply.

Please contact Dennis Hotovec at (800) 227-8917, extension 312-6582 or (303) 312-6582 if you have any questions or need more information. More information on the EPA Region 8 Class V program can also be found online at:
