Comment	Please refer to REM #10241 in the COGIS database for more information regarding this remediation project. Final samples indicate that the material is compliant with Table 910-1, except for Arsenic. Documentation attached to Supplemental Form 27 #401854170 shows that native Arsenic concentrations typically exceed Table 910-1 standards.

<p>On November 7, 2018 COGCC Western Environmental Supervisor Alex Fischer, EPS staff Stan Spencer, Steven Arauza, and Jim Hughes conducted an environmental field inspection of the Berry I31 596 Land Application Site, Facility ID #449191. For the most recent field inspection report of this facility, please refer to document #688800197.</p> <p>Confirmation sample results indicate that land farmed material is compliant with Table 910-1. Land farmed material will be spread out on the existing location. Rocks removed from land farm treatment cells will reportedly be used for armoring along berms, etc. REM #10241 has been closed in the COGIS database.</p> <p>During this inspection it was noted that the PBV labeled "100 bbl. Water/Condensate" is stained near the thief hatch. A tear was observed in the secondary containment berm liner. Ensure liner integrity.</p> <p>Sand bags are being stored in the secondary containment area for the tank battery. If not necessary for operations on this lease, have them removed.</p>	hughesjo	11/29/2018
