General Comment:

Conducted field visit to site of ongoing site investigation with Caerus EHS Lead, J. Janicek.

Well pad was undergoing interim reclamation operations on inspection date. Operator was also in the process of investigating and delineating impacted soil that had been discovered during reclamation. Approximately 3000 cubic yards of excavated, impacted soil are stockpiled inside of an earthen berm in the center of the pad. Excavation remains open on east side of pad. See photos.

Environmental**Spill/Remediation:**Comment: [Operator is currently conducting site investigation of impacted soil that was discovered during interim reclamation.](#)Corrective Action: [Operator shall submit an eForm 27 Site Investigation and Remediation Workplan to document site investigation projects to date in addition to future plans for delineation and remediation of impacted area.](#)
