Location Name: DKW GREEN STATE #BB 18-02

API: 05-123-19278

COGCC GISOnline aerial imagery from 2017. The main access road (highlighted in the red-dashed line) is no longer in need for oil and gas operations and historic imagery indicates this was not a pre-existing road. All associated wells and facilities have been plugged and abandoned along the main access road. Last well plugged along the main access road was 8/3/2015.

Photo 1. Photo taken from the main access road (shown in the aerial image), facing West. Operator has failed to reclaim the access road per Rule 1004 standards (e.g., recontour, decompact, etc.). Wind erosion and Russian thistle, annual weed, was observed along portions of the main access road.

Inspection Photos

Location Name: DKW GREEN STATE #BB 18-02

API: 05-123-19278

Photo 2. Photo taken from the southern well location, facing North. Mostly bare with no vegetation which is not reflective of reference areas. Also, location appeared to have an abundance of rock.

API: 05-123-19278

Photo 4. Photo taken from the northeastern well location, facing South. See comments under Photo 2.

Photo 5. Reference photo taken southwest of the location, facing Southwest. Reference area vegetation consists of the following, but not limited to, sand dropseed (*Sporobolus cryptandrus*), prairie sandreed (*Calamovilfa longifolia*), blue grama (*Bouteloua gracilis*) and sand sage (*Artemisia filifolia*).
